01 INTRODUCTION

This user manual contains important and specific information for the proper use and pairing of the **iButton**, which is used with the BH i-Remote and i-Core in the iAerolight, iGravelX and iRS1 electric bicycles. It is strongly recommended to read the entire manual carefully. User manuals for all BH models are available online at the following address:

<https://www.bhbikes.com/manuals>

Please note that the manuals are periodically updated on the BH BIKES website; always ensure you have the latest version. Refer to the version indicated on the cover page.

This document contains supplementary information to the general user manual, available at:

https://www.bhbikes.com/es_ES/quienes-somos/manuales-descargas

For specifications, recommendations, and warranty information regarding third-party components, please refer to their respective official websites.

02 GENERAL DESCRIPTION OF THE IBUTTON

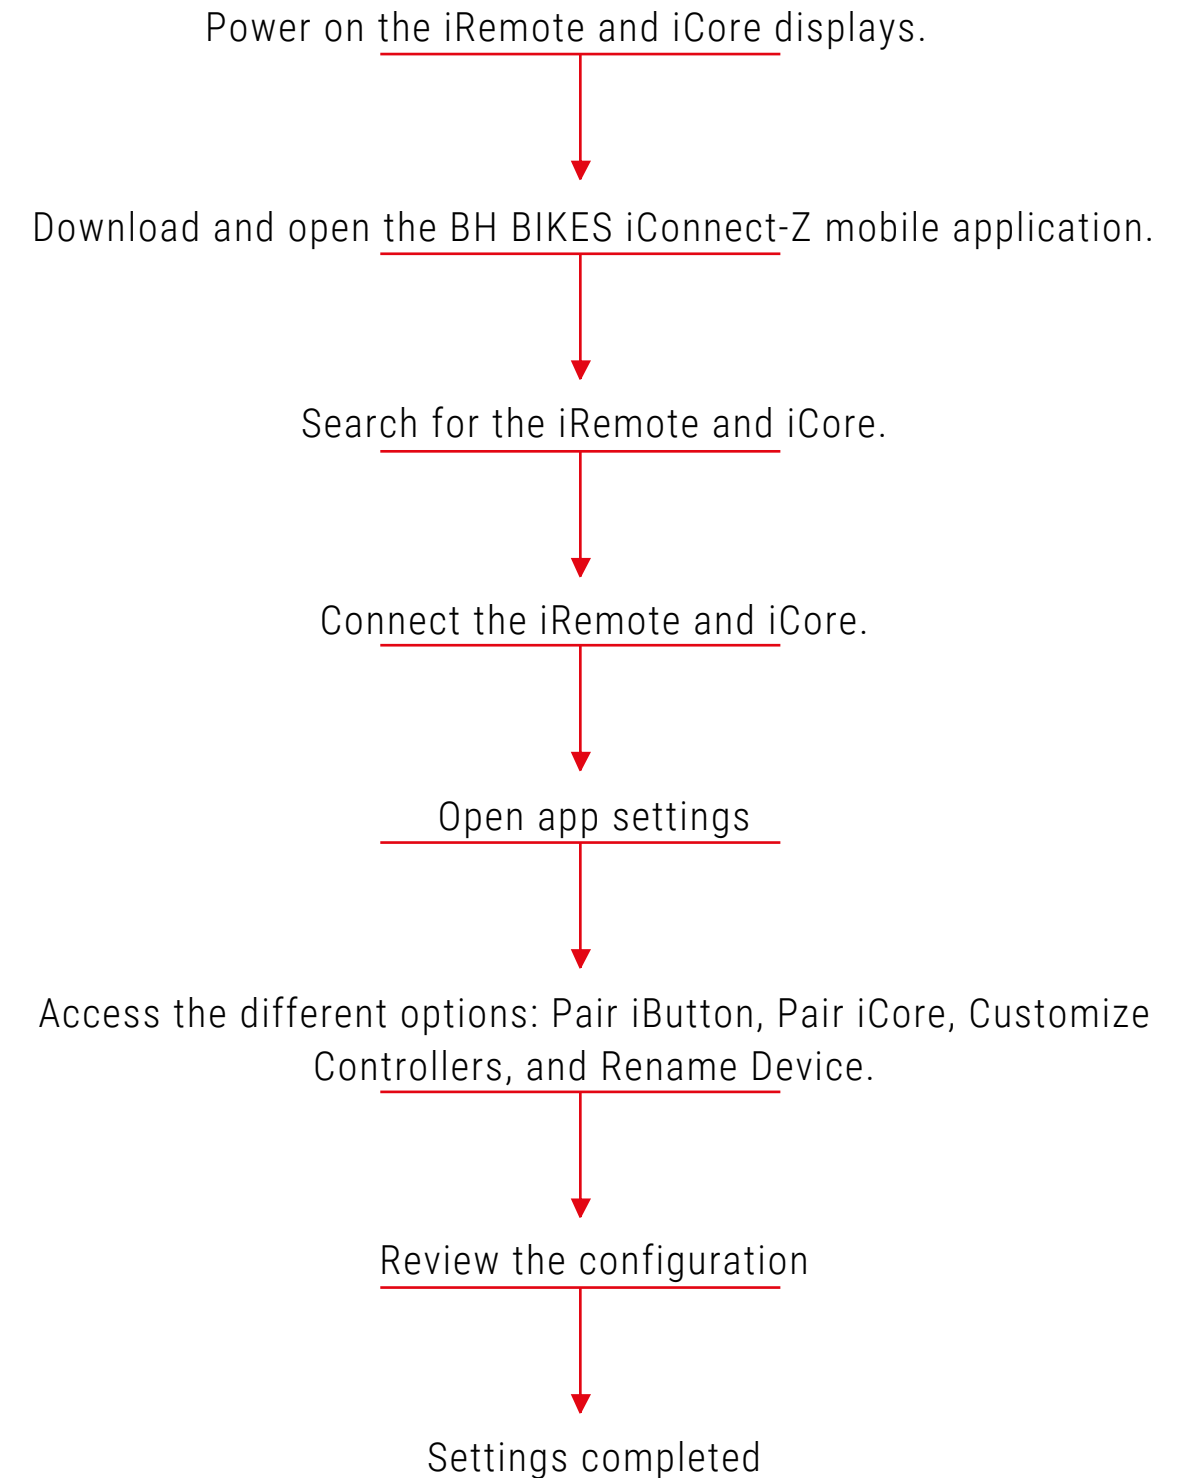

Throughout this document, you will find instructions for connecting, modifying, and customizing the iButtons used on the iAerolight, iGravelX, and iRS1 electric bicycles.

The iButtons are compact devices designed to be mounted on the handlebars of road bicycles using the handlebar tape, with no additional tools required. Each device can be assigned two distinct functions: one activated by a brief press (quick press) and another by a longer press (long press). These functions can include, for example, turning the bicycle's light on or off, or activating different pedal-assist modes.

Thanks to their flexible mounting system, each iButton can be positioned on the handlebar according to the cyclist's ergonomic comfort, facilitating intuitive use while riding.

03 PROCEDURE FOR PAIRING OR RENAMING THE IREMOTE OR ICORE VIA IBUTTON

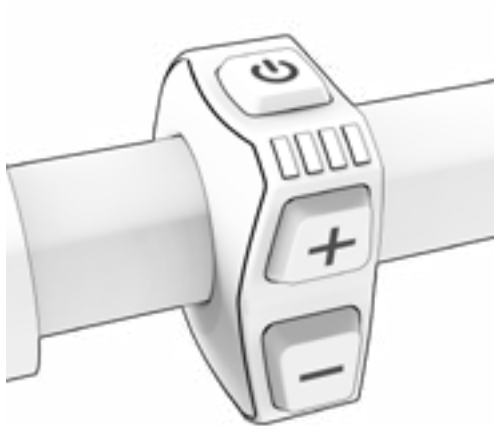

04 PAIRING ICORE OR IREMOTE WITH IBUTTON

The process for pairing the iCore or the iRemote with the iButton is as follows:

1. TURN ON THE ICORE / IREMOTE.

iCore

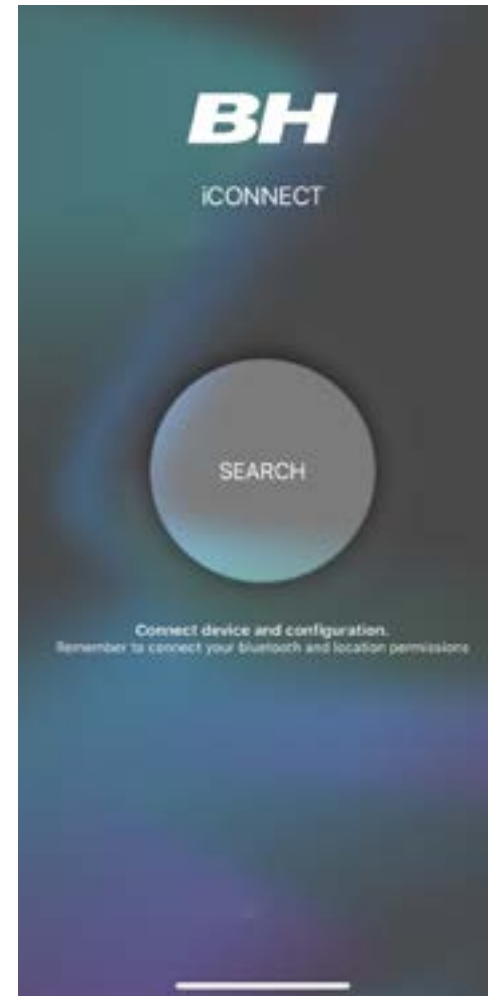

iRemote

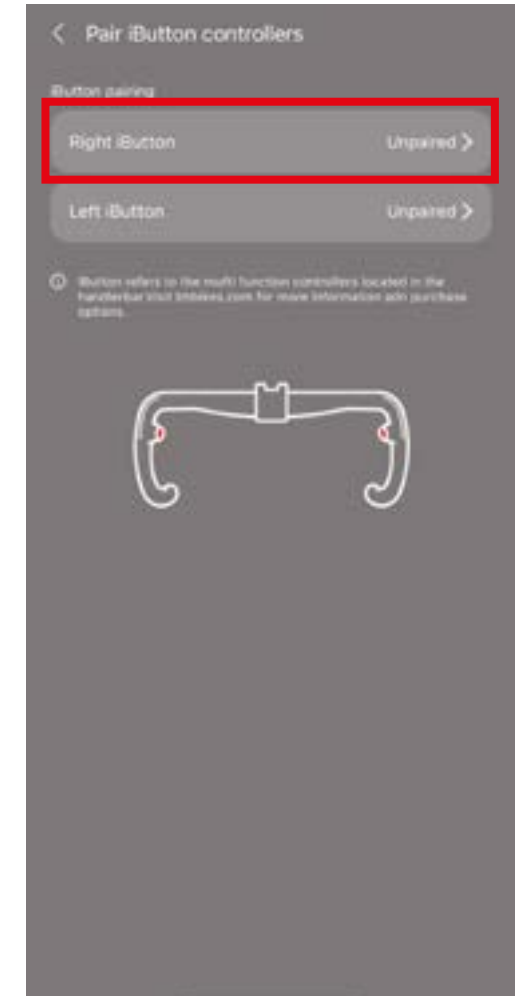

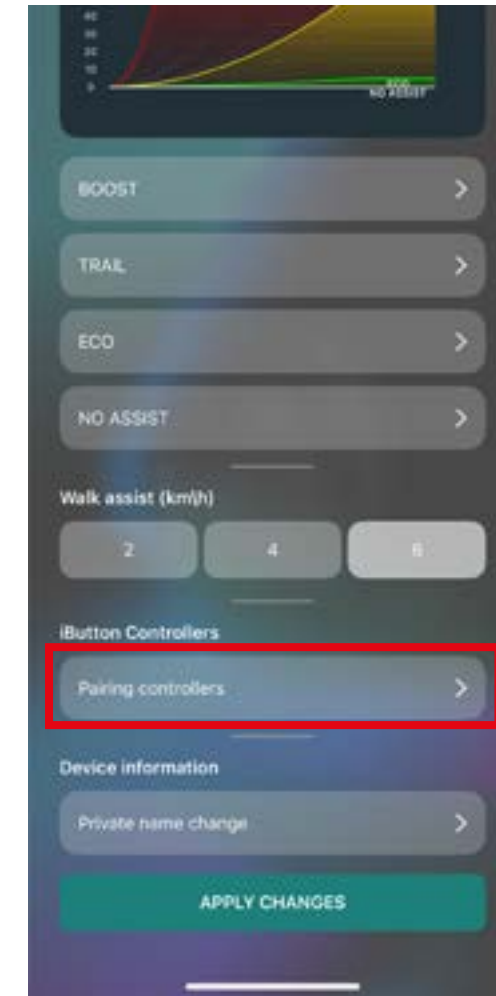

2. DOWNLOAD THE BH BIKES ICONNECT-Z APPLICATION.

3. OPEN THE APP AND CONNECT TO THE ICORE/IREMOTE.

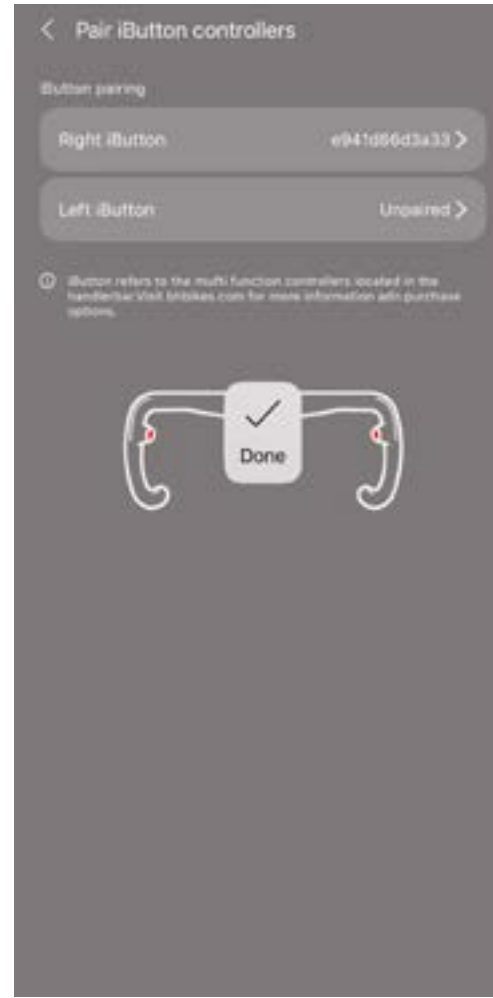

4. CLICK ON "PAIRING CONTROLLERS" AND SELECT "RIGHT BUTTON"

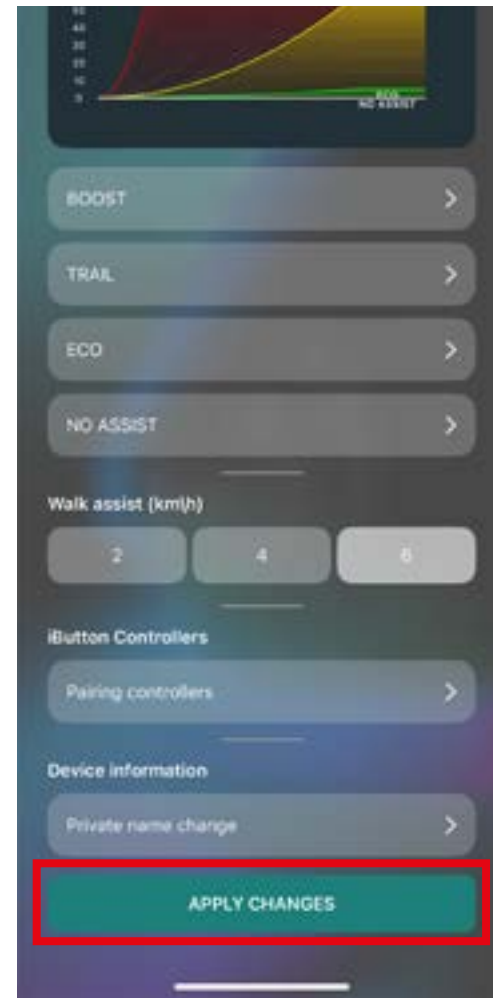

5. PRESS AND HOLD THE IBUTTON AND SELECT IT ON THE MOBILE SCREEN WHEN IT APPEARS.

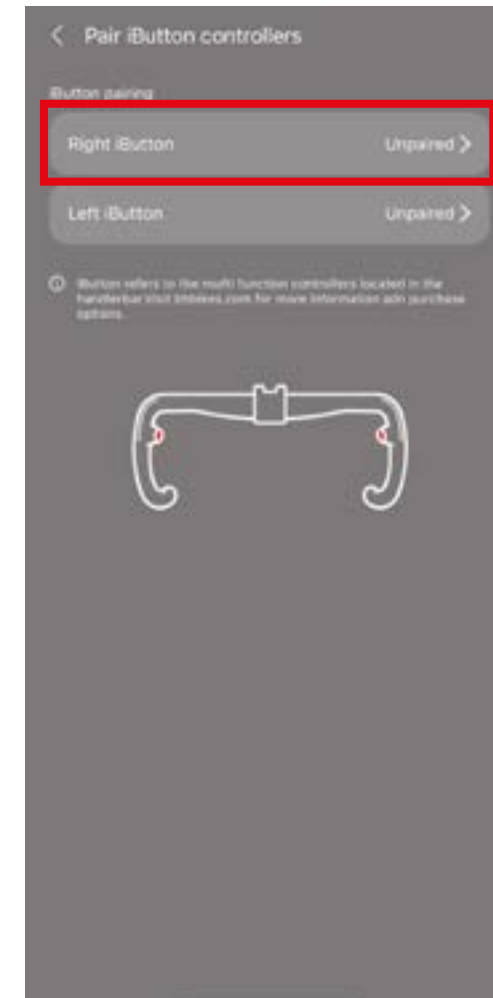

6. WAIT FOR THE APP CONFIRMATION TO ENSURE A PROPER PAIRING.

7. CLICK "APPLY CHANGES".

8. REPEAT THE PROCESS FOR THE PAIRING OF THE LEFT IBUTTON.

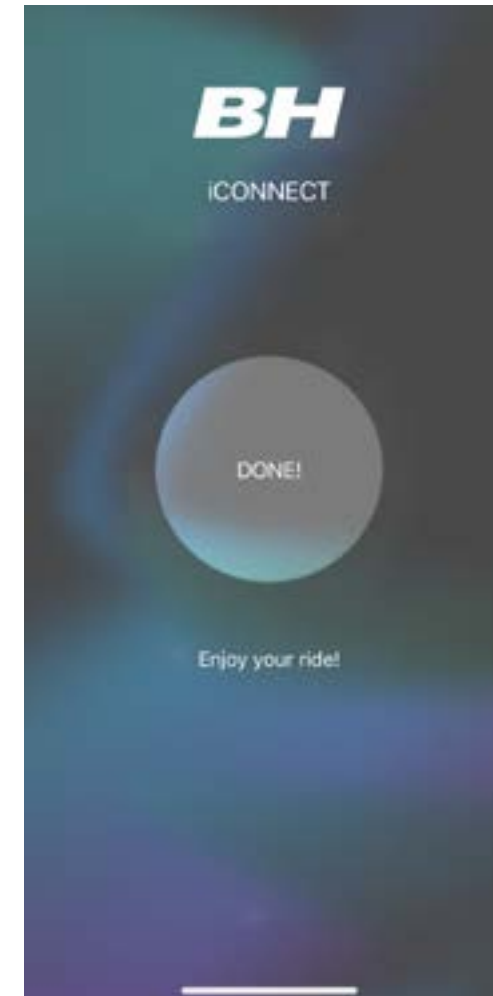

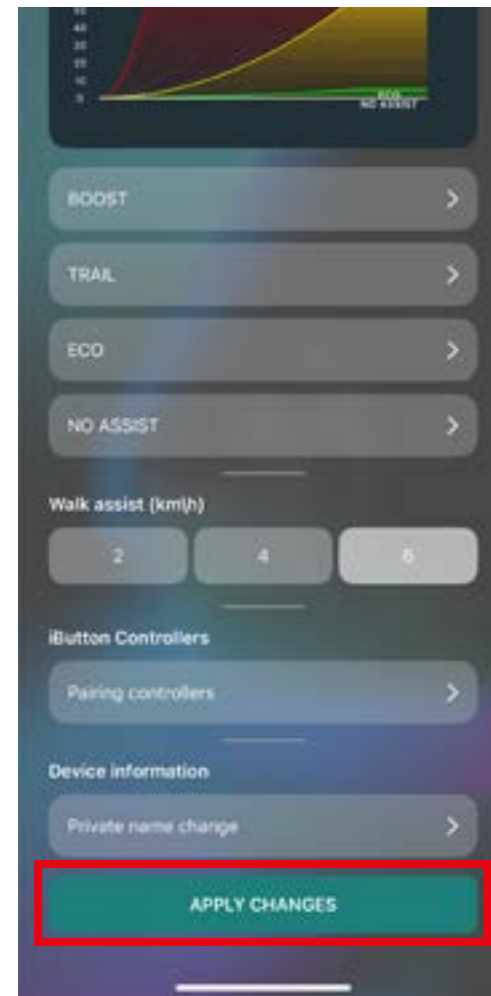

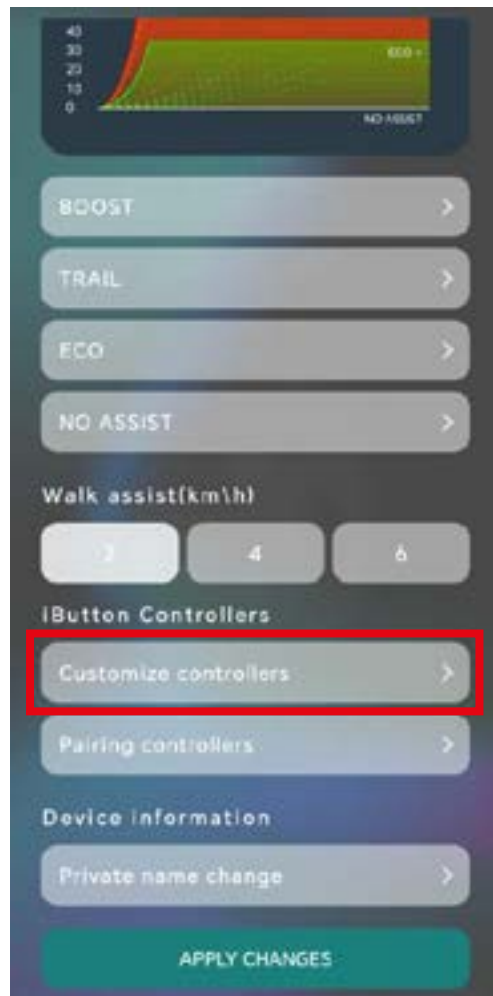

05 IBUTTON FUNCTIONS SETTINGS

The process for setting the functions of the iButtons is as follows:

1. CLICK "CUSTOMIZE CONTROLLERS"

2. MODIFY THE SHORT OR LONG PRESS FUNCTIONS OF THE IBUTTONS FROM THE AVAILABLE OPTIONS.

3. CLICK "APPLY CHANGES".

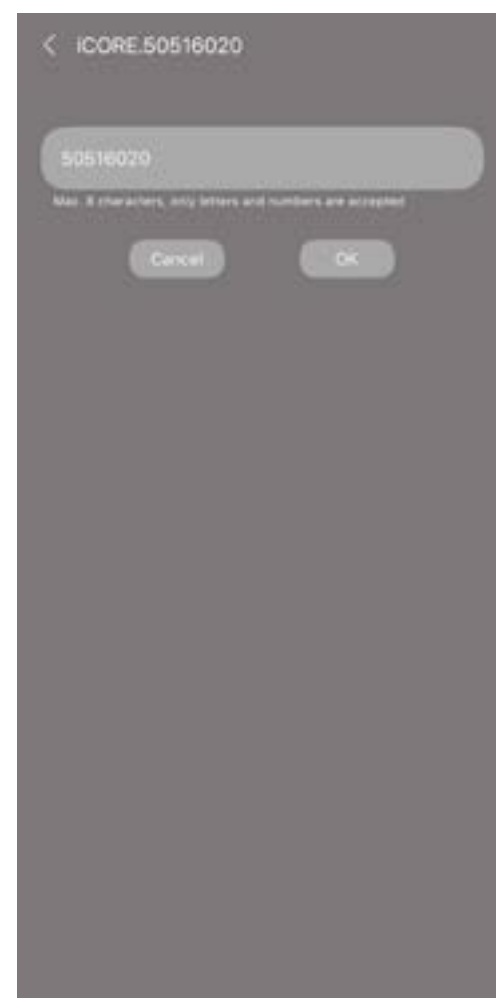

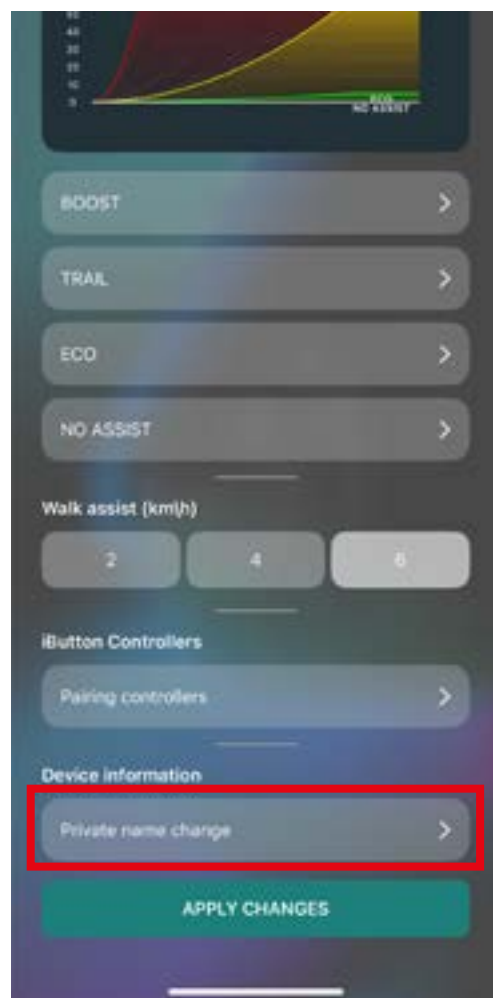

06 RENAMING OF THE IREMOTE AND ICORE

The process for renaming the iRemote and the iCore is as follows:

1. CLICK "PRIVATE NAME CHANGE"

2. ENTER THE NEW NAME AND THEN CLICK "OK".

3. IF THE CHANGE IS SUCCESSFUL, A "SUCCEED" NOTIFICATION WILL APPEAR.

AFTER THE NAME MODIFICATION, THE MONITOR WILL AUTOMATICALLY TURN OFF.

PLEASE RESTART IT AGAIN.

07 HELP AND ADDITIONAL RESOURCES

BH offers different channels to resolve your queries. In addition, you can join our global cyclist community on our social media.

TECHNICAL RESOURCES

You can find all of the resources you need to fine-tune your bicycle on the BH Bikes website. Click on the link below to access the user manuals, apps, warranties, display update files and videos that explain different operations:
